subjects.

LOCAL NEWS.

Mr and Mrs Wm Graden,
of Medicine Hat, visited with
Mr Graden's parents, here,
this week, on their way to the
Coast.

Jack McCulla returned on
Saturday from Winnipeg.

Mr & Mrs M Comisarow
had as visitors on Sunday
last: Mr & Mrs Ruding and
family, Mr & Mrs Margolis,
and family, Mr & Mrs Wain-
berg and family, Miss Everat-
chenska, all of Ledue.

Mr J. H. C. Lory leaves this
week, to resume his studies at
the Agricultural College at
Guelph, Ont.

Mrs Klapper and her son
Albert leave this week, to
spend the winter on the Coast.

Inga Councillors do not
met this month. Their next
meeting will be in Stony Plain
on Friday, Oct. 1st.

The silver tea given Satur-
day last by the Ladies Aid
was a very successful affair.

Mr Comisarow wishes to
announce that the Cash Store
will be closed on Sat. next,
Sept. 18th.

Stony is becoming so well
known as a centre for the dis-
posal of oil shares that one of
the leading oil companies pro-
poses establishing an office
here, if a suitable location on
Main street can be secured.

Local auto owners are con-
tinuing to be haled to the
Edmonton traffic court to
answer to charges of neglect-
ing to observe the "stop" sig-
nals on certain streets. One
localite appeared in that
court last week for leaving his
car in front of a city hotel,
on a main street, for a period
longer than five minutes. He
paid a fine. Tuesday's Bulletin
says: "Approximately 20 traf-
fic bylaw breakers will appear
at the bylaw court Thursday
afternoon (today). Six motor-
ists who failed to recognise
the 'stop' bylaw have been
summoned." One car-owner
of this district who had been
in the habit of making regular
trips to Edmonton for sup-
plies, and who was summons-
ed a short time ago to the
traffic court for an infraction
of a city bylaw of which he
says he was, not guilty, has
now cut out his shopping
trips to the City and is deal-
ing altogether with Stony's
merchants.

We Noticed This Week

Mr Benke and his trusty shot-
gun heading for the duck ponds—
Paul Meredith going after some
chickens with his ruck—Ralph
Witherspoon bound for Camrose
Normal, and Printer Alt leaving to
attend Victoria High—Bob Stoker
climbing a chimney, outside—Ph
Schewdt coming down Main St.
in his chariot—Dan Brox, on
Tuesday, with a carload of Stew-
art voters—Butch McKee driv-
ing home some prize beef.

Full Steam Ahead

Within a few days of the writing of this article the electors of Canada will journey to the polls in order to select their representatives in a new House of Commons and thereby also determine the political complexion of the Government. Before this article appears in print the verdict of the ballots will have been rendered.

Whatever that verdict may be, and at the time of writing it is very decidedly in doubt, it is to be hoped that it will be sufficiently decisive one way or the other to give the successful party a fair working majority in the next Parliament. It is in the interests of Canada that stable government be re-established and unquestionably the great majority of the people wish it.

Economic conditions throughout the Dominion are very satisfactory at the present time, business is good and promises to be better, industry in all its branches is active, trade is rapidly expanding, and increased prosperity is everywhere apparent. What Canada now requires is not only maintenance but to further advance these conditions, is a removal of the era of doubt and indecision in government which has existed as a result of the stalemate in Parliament.

A young country like Canada can ill afford to "drift" at any time, but at no time is such a policy, or rather lack of policy, quite so dangerous as during these periods when decision and vigorous aggressive action are necessary to take full advantage of the flowing tide.

Quite apart from all partisan considerations, or whether Mackenzie King or Arthur Meighen head the Government, there are certain policies which the present and future welfare of Canada demand should be adhered to and further developed. They may well constitute fundamental planks in the programme of all Canadian Governments, and it is to be earnestly hoped that a Government will be placed in office sufficiently strong to carry them out. Failing the creation of such a Government, both parties might well unite to give effect to them.

In the first place, the policy which has been developed during the past few years, and for which Hon. Mr. Robb certainly deserves great credit, of negotiating trade arrangements with various countries should be persevered in. The present activity in Canada's manufacturing industries is the direct outcome of this policy which has resulted in opening doors and creating wider markets abroad for Canadian goods. It is not a protective tariff designed to shut foreign-made goods out of Canada that has brought present prosperity, to manufacturers and the labor they employ, but the development of an export trade far exceeding anything hitherto known, and building up a favorable balance of trade amounting up into the hundreds of millions of dollars. Last year, for the first time in Canada's history, more manufactured goods were exported from Canada than were imported. This record should be maintained, and the favorable margin steadily increased. It can be done through the development of foreign markets, and the making of mutually advantageous trade agreements whereby such markets will be opened to Canada.

Secondly, unremitting attention should be devoted to the question of immigration. Close and expert study of every angle of this large subject should continue without any interruption, and necessary legislation passed, appropriations made, and efficient administration as free as possible of red tape provided, all to the end that an ever increasing stream of settlers may be lured here to till the fertile agricultural lands and develop the many other resources of natural wealth of which the Dominion boasts. There is no room for, and no reason for, party politics in dealing with this essentially great nation-building programme.

While Canada must continue to raise a large revenue for the Federal Government in order to meet and discharge our war obligations, further reductions in taxation should be made so as to relieve the individual taxpayer and release money for profitable and productive investment. The increased buying power of the people following tax reductions, the added momentum given to business and in all lines of industrial activity, resulting in increased employment, will, in the final analysis, so speed up the business of the whole that the Government will receive quite as large a revenue in the aggregate although each individual contribution will be smaller.

There are other matters calling for attention and definite action, but these three outstanding subjects of national importance should not be neglected no matter what the complexion of the next Parliament and Government may be. Furthermore, the Government should be called upon to carry these policies into early effect. Lastly, the Government, whether under Mr. King or Mr. Meighen, should be accorded support by the people as a whole in a united endeavor to give stability in government, sound administration, and vigorous action along broad lines of Canadian advancement.

Believes Leprosy Is Curable

Medical Secretary to Leprosy Mission Optimistic About New Treatment Dr. Robert G. Cochrane, who is not yet 30, has just returned to England after a 48,000-mile tour of the world's principal leprosy stations.

In his capacity as medical secretary to the Mission for Lepers, he has recently visited every center in Burma, India, Siam, Borneo and the Philippines.

For four months Dr. Cochrane lived among leprosy stations of the stations, spending his time attending to them and investigating their cases. He is very optimistic about future work.

"If you can get them early on in their trouble," he said, "many patients can be treated as outpatients. In all these early cases there is a great deal of hope. Medical advancement in treatment of the disease has been considerable in the past six years. It is necessary to recognize the disease early, then with efficient treatment and the segregation of old cases, the scourge will be got under control."

Once a leprosy patient has been early treatment the disease can be arrested there will be no difficulty in getting them to come forward to the stations. By the end of this century leprosy should, with the help of right measures, be considerably reduced.

For Aches, Pains,

The Safe Home Remedy NERVILINE

When sudden sickness comes, when the kiddies come in with colds, their little chests and throats clog with coughing, quick results always follow a vigorous rubbing with good old NERVILINE. If it's Croup, Colds, Whooping Cough, NERVILINE is a wonderful friend; it brings ease and comfort so quickly. For young and old, to overcome the minor ills that constantly arise in the home, nothing compares with "Nerviline"—35 cents at all dealers.

A train of sixty-five freight cars will be required to transport the bedding for the world's largest hotel, now building in Chicago.

Like a Grip at the Throat. For a disease that is classed as fatal there is probably none which causes more terrible suffering than asphyxiation. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restriction of air passages as thousands can testify. It is sold by dealers everywhere.

A charitable feeling causes some men when they see a fellow-man in distress to wish some other man would come along and relieve him.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their course unchecked, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surfaces. Miller's Worm Powders will not only exterminate these worms, but will also be mailed to all interested in fighting the scourge if application is made to Charles Walcott, 91 Brunswick Avenue, Toronto, 4, Ontario, Canada. Sole Canadian and American representative for The Cantanum Co. of England.

A dead man is of as much use in the world as a lazy one—and he takes up less room.

Minard's Liniment relieves stiffness

Discovered High Explosive

Lloyd George Says Few Helped Britain in Great War

Former Premier David Lloyd George, at the summer school of the Inter-Jewish Federation at Bangor, revealed that Dr. Chaim Weizmann, Zionist leader, helped to save the nation during the war by his discovery of an essential ingredient of high explosives.

"When asked what honor I could recommend him for he replied: 'I want no honor, but I would like you to do something for my people,'" Lloyd George said.

Lloyd George paid a tribute to Jewish war service, saying that no class responded more readily to the call than the Jewish people in every country. He declared the Jews are true to the country in which they dwell and that it was a great mistake to imagine that a race which was international could not be national too.

The Poisons We Love

Every healthy man, woman and child looks forward to the pleasure of appetizing breakfasts, tasty lunches and abundantly provided dinners without giving a thought to the time when such table delights will, for them, no longer hold attraction. If the reader will recall the many popular gourmands with whom he was acquainted, who no longer continue to meet him at the festive board, he cannot fail to be struck by the fact that almost every one of such friends were fatally stricken when they should have been in the prime of their lives. And if the actual cause of their deaths be investigated, the fact that the cancer scourge laid them low should give the reader food for candid personal self-examination.

The refined foods, rich sauces, meats, denatured vegetables and fruits, white sugar and white flour from all of which the last trace of health-giving potassium, and other salts have been deliberately or thoughtlessly extracted, unite in creating more acids in the body than any human liver can either neutralize or dispose of economically. The consequent state of acidosis is the precursor of the now practically universal condition of constipation and as Dr. Robert Bell, the eminent English authority, published to the world: "Constipation is the forerunner of Cancer."

The reason why cancer strikes civilized rich and poor in an impartial way is because civilization generally is suffering from an unrecognized potassium starvation. This peculiar form of starvation is essential to the establishment of cancer in the human body and as the late Dr. F. W. Forbes Ross stated in 1912, if the potassium deficiency be remedied, cancer, even in advanced stages, will retrograde. Upon the profound experience and knowledge of the last quoted English authority has been built the unique success of The Cantanum Treatment for cancer and other diseases arising from similar causes. A book explaining this treatment of the deadly self-inflicted blood disease of cancer will be mailed to all interested in fighting the scourge if application is made to Charles Walcott, 91 Brunswick Avenue, Toronto, 4, Ontario, Canada. Sole Canadian and American representative for The Cantanum Co. of England.

Mice and conclusions are not synonymous, yet women jump at both.

Poverty is one of the crimes for which a man is sentenced to hard labor for an indefinite term of years.

ARE YOU AFRAID OF YOUR MEALS?

Proof That the Stomach is Weak and Needs Toning Up

Are you one of the many sufferers who dread meat meals? Hungry, and yet afraid to eat, because of the pains and discomforts that follow. When the stomach is out of order the whole system suffers, and as the blood becomes thin and watery it becomes increasingly difficult to correct the digestive disorder. There is no tonic for the stomach that is not a tonic for the whole body; thus a blood-building tonic such as Dr. Williams' Pink Pills, not only relieves indigestion, but adds to the general strength. Mr. H. J. Shaw, Selkirk Road, P.E.I., has proved the value of Dr. Williams' Pink Pills in a severe case of indigestion and relates his experience for the benefit of other sufferers. He says: "I suffered from indigestion for a number of years. My case was so bad that words fail to describe it. My appetite was gone, constipation was frequent, and my nerves were all on edge. I could not sleep well at night, and the world was a dark spot for me. I tried a number of remedies, but without any benefit. Then Dr. Williams' Pink Pills were recommended, but without much faith, after so many failures, I decided to try them. After taking three boxes I noticed a change for the better. Then I got three boxes more and found I had a genuine remedy. I continued the treatment, took moderate exercise, could take plain food without suffering as formerly, and proved that these pills make good blood, and that this good blood will restore the stomach and nerves. Anyone suffering from stomach or nerve troubles will make no mistake in giving Dr. Williams' Pink Pills a fair trial."

Dr. Williams' Pink Pills are sold by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont. Write today for a copy of the free booklet "What to Eat and How to Eat."

A man who appeared in a Toronto court charged with stealing a drum didn't get a chance to beat it.

CHILDREN CRY FOR

Fletchers' CASTORIA
MOTHER:—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Dr. A. C. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Beware of cheap imitations. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoclonal Acetylsalicylic Acid (Acetylsalicylic Acid). It is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross".

Canadian Grown Seeds Enjoy A High Reputation Under The Canadian Standardization System

"Northern-grown" seeds are much discussed by farmers and gardeners who do not live in the north. The term has come to imply unimpaired vigor, early maturity and productive-ness. Canadian-grown seeds enjoy a high reputation because of these qualities and because there has been established in Canada a system for standardizing seeds under grade names designated in the Seeds Act. The inspectors of the seed branch of the department of agriculture inspect seed crops for purity of variety at a cost of fifteen cents per acre to the farmer. The threshed and cleaned seed is again inspected by the same officers, and if of superior quality is graded, registered, and sealed in the bag for commerce.

The quantity of registered, extra No. 1, and No. 2 grades of inspected seed crops produced in Canada is much in excess of domestic requirements, and large amounts of seed oats, barley, wheat and rye are offered for export under seed inspection certificates. Because of having so large a quantity available in the domestic market, the cereal crops in Canada during the past fifteen years have become greatly improved, with fewer varieties and the general use of seed that is true to a desirable variety.

Alfalfa grown in Canada controls the world's prices for that commodity. The rich, moist, clay loam soils of Canada produce alfalfa seed of a quality unequalled by any other place in the world. The world's greatest centre of alfalfa seed production is probably Victoria county in the province of Ontario.

Under the seed branch service of field crop and seed inspection, alfalfa seed production has increased in twenty-five years from nothing to more than one hundred thousand bushels. Our exports from last year's alfalfa seed crop amounted to approximately seventy-five thousand bushels. The Ontario Variegated and the Alberta Grimm varieties of alfalfa seed are sought after in many countries because of their proven winter hardiness and superior quality for forage purposes.

Grass seed production includes many kinds: Timothy, western rye grass, bromus grass, and, in recent years, that finest of turf grass, brown-top. Twenty-five thousand pounds of seed of this latter grass was produced last year on Prince Edward Island from inspected seed crops, and it is anticipated that this amount may be increased this year to sixty thousand pounds. Seed of No. 1 grade will yield approximately 100 bushels per pound. The No. 2 grade and other inferior qualities equal or superior to the imported stocks of the same species will be sold in competition with them at prices commensurate with the quality.

From the broad grass seed crop five hundred thousand pounds were inspected and sealed in the sack for export at a cost for seed testing and sealing of one-fifth of a cent per pound. Trading on the basis of an inspection certificate, as distinguished from a type sample certificate, would seem to be highly satisfactory to seed merchants.

Thus far the greater part of Canadian requirements of field root and garden vegetable seeds have been imported. Fifteen years ago a start was made by the seed branch to encourage the home production of these seeds. The work so undertaken was attended with success but was disrupted during the war. About thirty-five farmers and gardeners who have made a specialty of growing seed of one or more kinds of these crops have continued throughout, and during the last few years these have steadily increased in number. The profiles of British Columbia offer numerous local climates, soil and water, ideal soil and moisture conditions the best quality of field root and garden seeds in the world may be economically produced in quantity for commerce.

The development of this industry will necessarily continue to be slow because it requires many years of special training on the part of the seed grower. Horticultural plant breeders at the various experimental stations in Canada have undertaken to provide

Elite stock seed specially bred and selected to fit into Canadian climatic conditions. It is to the multiplication of this stock seed that the growers in British Columbia and other parts of Canada will devote their attention. The steady development of this special industry is reasonably assured because the quality of the seed produced exceeds that of any other seed, and is particularly suitable for Canadian use.

Discoveries By Plant Wizards

Important Results Obtained By Experiments in Plant Breeding
Since Dr. Charles Saunders originated Marquis wheat, which for 15 years has won the world's wheat prize at the International Show at Chicago and is the most popular spring wheat among American Canadian farmers, several other important discoveries in agriculture and horticulture have been made by the plant wizards or practical scientists at the 27 Canadian Government experimental farms. The discovery of Marquis wheat, which is regarded as one of the most notable in agriculture, was made at the Central Farm at Ottawa.

It was at the same farm that L. P. Newman, Canadian Government cerealist, originated Garnet wheat, a variety of spring wheat that matures from seven to ten days earlier than Marquis, stands dry weather and excessive moisture better, is more immune from the danger of rust than any other wheat and because of its earlier ripening advantages will extend the wheat growing area of Canada 100 miles further northward and open up for wheat growing an area of over 40,000 acres.

Important work in plant breeding in fruits, vegetables and flowers is now being carried on. In recent years 200 varieties of apples have been originated at these experimental farms. Most of the old varieties grown in North America originated in Britain or Europe, but many were proved unsatisfactory in the colder provinces; and in order to obtain greater hardiness the best Russian apples were crossed with well-known American varieties, but the quality was poor. At one of the experimental farms in Quebec 76 different strains of tomatoes are being tried out.

The outdoor rose of highest excellence, the Agnes, according to the American Rose Society, is also an original product of the Canadian Government Farm at Ottawa. This rose was recently awarded the Walter Van Fleet gold medal, the most coveted award of the A.R.S.

In addition to experimental work the experimental farm system is concerned with the control of fungous and other plant diseases, and laboratories have been established at various points with this end in view.

Expect As Big Crop As Last Year

Returns Would Indicate Above Average Crop For Western Canada
In the latest crop report, issued by the Manitoba Free Press, based on information received from over 500 correspondents throughout the provinces of Manitoba, Saskatchewan and Alberta it states that "taking into consideration the increased acreage in the western provinces, the outlook would appear to be for a yield as big as last year."

The question asked the correspondents included one as to the estimated yield, and commenting on the answers to this question, the report says: "We believe these will put aside the ideas of a poor crop in Canada this year. Last year's wheat crop in Canada tallied 411,375,700 bushels from 21,877,132 acres of which 282,505,000 bushels were grown in the three prairie provinces—Manitoba, Saskatchewan and Alberta. The average yield of wheat for the Dominion in 1925 was 18.7 bushels per acre.

The total production of oats in Canada last year was 513,234,000 bushels from 14,472,520 acres, an average yield of 35 bushels to the acre. Barley yielded 112,668,300 bushels from 4,075,955 acres, an average of 27.6 bushels per acre.

Last year's wheat yield was the second largest on record in Canada, the previous highest total being 474,199,000 bushels in 1923. Other high yields were 399,785,400 bushels in 1922, 300,853,100 bushels in 1921 and 292,542,600 bushels in 1915.

British Settlers Leave For Bolivia

Former Service Officers Will Form Settlement on Paraguay River
A party of British former service officers have sailed on a 60-ton river steamer for Bolivia, where they propose to form a new settlement and grow cotton and market timber. The Bolivian Government, to encourage the settlement, has reopened Port Gaithe on the Paraguay River, which will afford water transport to Puno, Alca, giving Bolivia, for the first time, convenient access to the Atlantic Ocean, 1,500 miles away.

All members of the British expedition are said to be experienced in tropical work.

Lethbridge Irrigation Tract

Crop This Year Is Expected To Be Worth \$2,000,000
The Lethbridge Northern Irrigation tract, opened for settlement a couple of years back, is, according to the Provincial Government report, proving prosperous to the farmers occupying there. In 1925 the total production of the tract was valued at less than \$400,000. This year it is expected to reach \$2,000,000. New towns are growing up following the extension of the railway and fine homes are being built.

If a man amounts to anything in a small town he soon begins to think that he would amount to more in a large town.

American Tourists Will Spend \$190,000,000 In Visiting Canadian Points This Year

Reward Wheat

New Variety of Wheat Being Tested Out At Ottawa

A new hard spring wheat which gives promise of being even better than either Marquis or Garnet, is being tested at the Canadian Government experimental farm at Ottawa. The name of this new variety, it was learned is "Reward" which, according to tests made in recent years and are still being carried on, will ripen ten days earlier than Marquis. It is also believed "Reward" will have equally as good milling qualities and will give even heavier yields, because of the heavier weight. Measured bushels of "Reward" which have been grown in Ottawa weigh as high as 65 pounds.

Cerealist believe that if successive tests measure up as well as those of recent years have done, the "Reward" variety will supersede Marquis, the wheat that for 15 years has won the world's wheat prize at the International Grain and Hay Show at Chicago, and even Garnet, a new wonder wheat, which also ripens ten days earlier than Marquis, but which does not mill as white.

Free Homestead Lands

Still Available in the Three Prairie Provinces

In July of this year a total of 658 homestead entries were registered by the Canadian Government department of Interior compared with 402 in July, 1925. Of the 658 entries 300 were made by settlers from the United States, the largest total of any nationality. The Edmonton district received the greatest number of entries with a total of 132. The Prince Albert district came next with 185 and Moose Jaw third with 112.

Homestead lands in free grants of 80 acres are available to settlers in the provinces of Manitoba, Saskatchewan and Alberta and in the Peace River block and the railway belt of British Columbia, on payment of a registration fee of \$10. If a settler is no British subject he must declare his intention to become one on filing on a homestead. These homestead lands owned by the Canadian Government are now a considerable distance from the railways and markets, but there are millions of acres of good farm land in Western Canada near to railways that can be purchased from \$15 to \$20 an acre.

Delicate Woman

Policeman—"It seems to be your fault, mister. It's a wonder you weren't killed! Why didn't you put on your brakes?"
Motorist—"My wife wouldn't let me! They squeak and make her nervous."

Unofficial estimates prepared by authorities of the United States department of commerce forecast an expenditure this year closely approaching \$200,000,000 by American tourists in Europe. To this they add \$150,000,000 to the amount that probably will be spent by American visiting Canada, bringing the total of this item, classified as an "invisible export," to \$350,000,000.

The amount spent in Europe, Canada and other foreign countries by American tourists this year may reach a much higher figure, as foreign travel this summer increased in volume, due to large part to lower rates for certain classes of steamship accommodations.

It is too early to determine, officials said, whether the alleged mistreatment of American tourists in Paris and the criticism heard in France and England arising out of the inter-allied debt situation, have seriously affected the outward movement of Americans. Department of commerce officials were inclined to believe, they said, that the troubles experienced by American tourists in France have not discouraged other Americans who plan to take their vacations abroad.

It was pointed out that, whereas England in 1925, paid only \$187,000 in principal and interest on its debts to the United States, American tourists that year spent there at least \$140,000,000, according to figures prepared at the department of commerce.

"The expenditures of American tourists to Canada as reported from official and semi-official sources showed roughly a \$10,000,000 increase over 1924. Approximately 2,000,000 motor cars carrying 5,000,000 people entered Canada from the United States in 1925. These tourists probably spent \$145,000,000 in addition to \$45,000,000 exported to have been spent by American tourists arriving by rail and steamer.

"The total spent by American tourists in Europe, Canada and elsewhere comes to \$630,000,000. To this may be added \$20,000,000 for expenditures of American residents abroad more or less permanently."

Wonders Of Plant Life

Believes Plants Have Their Own Hours of Sleep

Plants not only have their vines, vanities and regular hours of sleep, but some possess a sixth sense as well, according to Sir Jagdish Bose, one of Britain's greatest scientists and authorities on plant life. The sixth sense possessed by certain species is a mysterious force which permits them to detect minute changes in the intensity of light, changes that go unnoticed by the human eye.

The minute plant spends its life in a leisurely way. It wakes gradually between 8 and 10 o'clock and noon, remaining alert until evening and falling fully asleep only in the early hours of the morning.

Sir Jagdish has perfected a marvellous piece of apparatus which gives plants under observation a questioning shock every hour of the day and night and records the answers.

Indians' Prayer Answered

Members of Hopi Tribe Stage Annual Dance For Rain

Wishes that seemed but harmless and depressions in the desert, as thoughts of "rain" hastened toward the weird ceremonial of the Hopi Indians' snake dance at Flagstaff, Arizona, became "razing torrents of muddy water within two hours after this year's prayers to the gods for rain were concluded."

"The dance comes annually after eight days of preparation. Last year also rain followed the dance and several motor cars were wrecked.

"Harold, my father doesn't like you very well."
"That's nothing; my whole family objects to you."

A non-vanishing hawk has been developed at Winnipeg. Now for a long less potent.

College Students With Harvesting Outfits

Here is a group of over 40 husky lads from the Wyre Agricultural College, Kent, England, and from Oxford University, photographed at the Canadian Pacific Railway station at Winnipeg, where they arrived from England recently to do harvesting in the prairie provinces. The boys have

been placed by the Woman's British Emigration League, two of whose representatives are here photographing with the group. The young men came from all parts of the Mother Country, and are members of prominent families there. The arrival of such a group is only another indication of the type of men who are scattered

throughout the west on harvesting outfits. Besides affording them the opportunity of building up physically, these young men realize that in no better way could they become conversant with agricultural conditions in the Canadian west. They will return to their school in England at the end of October.

WORLD HAPPENINGS BRIEFLY TOLD

Official statistics show that 3,274 persons have already been killed this year in 25 United States cities as the result of motor accidents.

After having been in Brazil for several weeks giving lectures and in other cities, Mme. Curie co-discoverer of radium, sailed for her home in Europe.

What was apparently a meteor started the north midland counties of England when a mysterious explosion was followed by a sudden blaze of light.

At their home in Ottawa, Right Hon. W. S. Fielding and Mrs. Fielding recently celebrated their golden wedding anniversary. A large number of congratulatory messages were received.

Mrs. Annie Clarke, aged 99, is receiving the plaudits of all Donegal. She completed the mowing, tying and stacking of an acre of oats, and found it at six feet high, completing the task in a week.

Preparations are being made at Tokio's great cat and dog cemetery, wherein repose the bodies of more than 20,000 pets, for the annual animal economy at which insoluble prayers are said for their spirits.

United States citizens settling in Canada in the last 15 years brought with them cash and effects to the value of \$163,470,563, according to the department of immigration and colonization.

The government is now investigating the rubber industry in Alaska, with the object of introducing this animal into the northern part of the Mackenzie district, which is the home of a considerable portion of Canadian Eskimo population.

Four hundred Menonites are expected to reach the town before the snow flies, according to Bishop David Toews, chairman of the Menonite colonization board and land settlement board. Most of the newcomers will be placed on the land immediately on arrival.

A Famous Man

The originator of Dr. Pierce's Golden Medical Discovery for the blood, as well as the "Favorite Prescription" for women, was Dr. J. C. Pierce, a practicing physician in Western Pennsylvania. He early moved to Buffalo, N. Y., and established "The Invalids' Hotel," then he put up his home remedies in the World's Dispensary, where they were carefully prepared from roots, herbs and barks, and blended them with drugs all over the U. S. and Canada.

For over half a century, Dr. Pierce's Discovery, for the blood, has been sold in larger quantities by druggists than any other medicine. It is a tonic in its effect on the stomach and digestive apparatus; an alternative in action on the blood, liver and skin. It increases the appetite, stimulates the digestion, cleanses the blood, clears the skin of eruptions and blemishes, and makes both men and women feel as they did when they were young and care free.

Ask your nearest druggist for Doctor Pierce's family medicines, in tablet or liquid form, or send 10 cents for a trial package of tablets to Doctor Pierce's Laboratory in Bridgeport, Ont.

"IDEAL fashions" by *Van-Dine Hamilton*

A Smart All-Day Frock

The combination of materials offering possibilities for the semi-tailored model picture here. The blouse, which has both sides of the front buttoned onto a narrow vest, ends in points, and has a simple convertible collar and kimono-sleeve shoulders. The skirt is plain at the back and gathered in front between the points of the bodice. The long full sleeves are gathered into narrow wrist bands. No. 1409 is for misses and small women, and is in sizes 16 and 20 years. Size 18 years (36 bust) requires 3 yards 29-inch figured material, and 5 yard plain contrasting; or 3½ yards if made all of one material. 20 cents.

Our new Fall Fashion Book, illustrating styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

The "Dead Point" in Canadian Progress

By C. W. Peterson

The Great War and its aftermath of economic misery in Europe demonstrated the dire social effect of overpopulation in highly developed countries. Nature, however, has a way of effectively compensating for such conditions, and we are now witnessing the operation of this corrective process in the rapidly falling birth rate of the more advanced countries of the world. It is, however, an open question whether such over-population brings in its train greater economic evils than under-population in an undeveloped country of such enormous extent as Canada.

A young country of vast natural resources obviously faces difficult problems of administration. Such resources lie dormant until the magic touch of man can tap and render them available. And until they are made available and contribute to the national wealth they cannot be taken seriously as an asset. All this involves the opening up of the country in the most efficient manner in terms of great expenditure on transportation facilities of various kinds and for providing such amenities as will attract the homebuilder and capital. Governments and municipalities are consequently faced with perpetual demands on their credit and resources, all of which add to the burden of taxation. If this, in turn, becomes too high, it acts as a serious deterrent to capital and immigration.

New countries, therefore, normally gravitate "between the devil and the deep blue sea," until they successfully overcome the "dead point" in the revolution of progress through reaching a population and general development approximately sufficient to absorb the abnormal overhead inseparable from the earlier stages of pioneering conditions. Canada just now is drifting about in the doldrums of this difficult period, laboriously carrying the burden, public, private and corporate, of every sort of modern facility, to accommodate a population at least four or five millions greater than what it is today. So the outstanding problem in Canadian public policy just now is how to augment rapidly our landless agricultural population. Compared with this, all other issues are insignificant.

There has always been a deplorable tendency on the part of Canada to follow blindly in the administrative footsteps of the United States. This was never more apparent than when, laboring under wartime emotionalism, we adopted drastic excision regulations following the imposition of the eight-hour day of the line. We never stopped to consider that the United States carefully refrained from any such measures until her population exceeded a round hundred millions and she was on the verge of heavy importation of foodstuffs. We cannot possibly escape the conclusion that the United States is a great, prosperous nation, whose citizens enjoy a standard of living far above that of any other, except perhaps Canada. In the eyes of almost the entire world this country easily represents the modern El Dorado. All this has been accomplished largely through the "open door" policy. If we in Canada could attain the same degree of material success within a similar period, we would apparently have reason to be amply satisfied with ourselves. That we can accomplish this through immigration policies proceeding in the opposite direction to those that made the U. S. great is, however, open to serious doubt.

Corn is painful growth. Hollow way's Corn Remover will remove them.

Experimental telephone lines between the engines and cabooses of long freight trains have proved effective time-savers in operation of the trains, according to officials of an eastern railway.

SUNDAY SCHOOL LESSON

SEPTEMBER 19
OBEDIENCE TO LAW (TEMPERANCE LESSON)

Golden Text: Drink no wine nor strong drink, thou nor thy sons with thee. Leviticus 10:9.
Lesson: Leviticus 26.
Devotional Reading: Proverbs 23:29-35.

Explanations and Comments

Promises of Blessings to Those Who Obey the Law, verses 3-12.—With these verses compare Ex. 23:20-23 and De. 28:1-11. Bacon was right when he declared that "Prosperity is the blessing of the Old Testament." If Israel is faithful, if she keeps the laws, she is here promised the blessing of fertility and the products of the ground, the fruit and the grain shall be hers. "A truly modern mind seems the idea that the fertility of the soil can be affected by immorality. Yet there is the whole of Mesopotamia to show that misgovernment can make a garden into a desert. Where idling populations once covered the country with fruitful gardens and luxurious cities, there are now the land of the Tigris and Euphrates a few handfuls of people, and all the fertility of the country has disappeared. Irrigation channels which made all this life have been gradually filled with drifting sand, and one of the most populous and fertile countries of the world has become a desert. In Palestine the same thing may be seen. Under Turkish domination the character of the soil changed. In many places vines in ancient days the hills were terraced to the top, the sweeping rains have had their way and the very soil has been carried off, leaving only rocks to glitter in the pitiless sun" (Andrew Harper).

The Oil of the People.—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

Growth of Wheat Pool.—The capacity of pool terminals in 1924 was 570,000 bushels; in 1925, 2,370,000 bushels; and today 17,450,000 bushels—not including leased terminal space on the Pacific coast. For the week ending August 31st, 500 farmers in Saskatchewan decided to pool their wheat and signed up 76,187 acres. In addition, 135 new co-op grain contracts were received, covering 9,642 acres.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

BRITISH MARINES ARE KILLED BY CHINESE TROOPS

Shanghai.—Three British naval officers and four seamen were killed and two officers and thirteen seamen wounded by Chinese troops of Wu Pei Fu's northern army at Wanshan, Chechwan province, 1,250 miles up the Yangtze River. The British gunboat Cockchafer, returned the fire, doing considerable damage to Wanshan, a city of 150,000. How many Chinese were killed or wounded is not known.

The conflict was begun when a British naval party of forty men on a river boat attempted to release two British steamers, the Wahlen and Wantung, seized by the Chinese in reprisal for the alleged drowning of fifty-six Chinese soldiers August 29, when the British steamer Vanlu, in attempting to escape from Chinese captors, upset three native boats.

The British killed were: Commander F. P. Harley and Lieut. A. R. Kiggins, of the gunboat Dispatch; Lieut. C. P. Ridge of the gunboat Cockchafer and Seamen Farmler, (Jian-lam, Marrot and Farrow.

The Chinese troops were commanded by General Yang Sen, an adherent of Wu Pei Fu, war lord of the central provinces, who was at Hankow, hundreds of miles distant, defending himself against Cantonese forces. Yang's men had seized the British steamers and refused negotiations and threatened to fire upon the officers of the gunboat Cockchafer.

The British retired but the next day, September 6, the small river steamer Klawo, with forty men of various British gunboats aboard, succeeded in rescuing the officers of the steamer Wanshan before the Chinese firing the banks of the river began firing.

The British party, under fire, attempted to approach the steamer Wantung but twenty-two of the forty men of the British navy were killed or wounded. They stood by, however, with their unprotected native boat while the Wantung's officers leaped overboard and rescued all of them, from the water except Chief Engineer Johnson, who was wounded or drowned.

The British gunboat Cockchafer then bombarded the city of Wanshan, its shells doing much damage, with an undetermined number of Chinese casualties.

Would Take Drastic Action If Necessary

British Government Is Ready To Assist Mine Workers

London.—The decision of the mine owners to refer to the various districts the question whether the executive shall be given power to negotiate with the miners for a national agreement is a result of Churchill's threat that the government having given a guarantee of fair play to the miners, would, if necessary, take drastic action against the owners if they persisted in their hard attitude.

The official report of the proceedings of the conferences, as issued by the government, was carefully edited for public consumption, but it is understood that Churchill during the meeting expressed himself with force and emphasis and told the owners that it was impossible for the government to allow mere stubbornness on their part to prevent a settlement if the miners were willing to make real concessions as it seems they are prepared to do.

Working On Bay Line

First Train Into Kettle Rapids Expected About Sept. 20

Regina.—The Hudson's Bay Railway, according to information received here by the Dominion Railway Association, is being pushed on. Mayor Hart, of Le Pas, states in a letter to the association that bridges are completed at Livingstone and Atholville, and the first train into Kettle Rapids, which is the present end of the steel 92 miles from the bay, is expected around September 20.

W. N. U. 1646

Canadians Serve On League Committees

Representatives Have Been Appointed On Six At Geneva

Geneva.—Canada secured representation on all six committees of the League of Nations assembly.

Sir George E. Foster serves on the first committee, which deals with legal and constitutional questions.

Sir George is also a member of the sixth committee, along with Dr. W. A. Riddell, permanent representative of Canada at Geneva. The sixth committee deals with political questions.

Hon. Philippe Roy, Canadian commissioner-general in Paris, takes his seat on the second committee, handling technical and organization questions.

The third committee considers the question of the reduction of armaments, and Hon. Mr. Roy and Sir Herbert Ames, financial director of the League of Nations, represent the Dominion thereon.

Sir Herbert Ames was elected also as a member of the fourth committee to deal with finance.

Dr. Riddell is on the fifth committee, which handles social and general questions.

Report Is Encouraging

Selected Immigrants Making Good Says Overseas Representative

Winnipeg.—Under the selective plan of immigration, the families being brought to Canada from Great Britain are proving themselves willing farmers, and are making good, according to Rgv. J. W. Whillans, overseas representative of the British settlement service.

In connection with the activities of the service in Great Britain, Mr. Whillans stated that lack of interest and lack of money were the two great obstacles which have to be overcome by those seeking to attract immigration of a desirable character to Canada. He considered that the former problem would be met gradually as those who have immigrated made good, but that the second difficulty is one of economics which can only be adjusted by some form of legislation or a general betterment of conditions that is not apparent at the present moment.

First Message Between Irish Governments

Ulster Expresses Sympathy With Free State Over Gains Tragedy

Dublin.—The first message of sympathy between the two Irish governments, in the form of a cable, was sent yesterday from the Free State to the Ulster government, expressing sympathy with the Free State executive council, expressing Ulster's profound sympathy with those bereaved in the cinema tragedy at Draculocherry.

Belfast, Ireland.—For the first time in history a message of sympathy has passed between the two Irish governments.

Finance Minister Hugh Fothergill, acting in the absence of Premier Craig, telegraphed President Cosgrave, of the Free State executive council, expressing Ulster's profound sympathy with those bereaved in the cinema tragedy at Draculocherry.

A Handsome Bequest

Late Baroness Strathcona Left Montreal Hospital \$125,000

Edinburgh, Scotland.—The will of the late Baroness Strathcona, who died on August 18 last, which was filed at Register House here, is dated November 17, 1925, and includes, among other public bequests, one of \$25,000 (about \$125,000) to the Royal Victoria Hospital, Montreal.

Baroness Strathcona was a daughter of Lord Strathcona, a former high commissioner for Canada in London, and succeeded to the title upon the death of her father in 1914. She was married in 1888 to Dr. Robert James Bliss Howard, of Montreal, who predeceased her in 1921.

Trying To Cap Volcano
Managua, Nicaragua.—German miners are engaged in the unique task of trying to put a cap on a volcano, Manana, which is near the town of that name. They seek to close the crater so that its poisonous gases will not escape and damage the crops.

WOULD DEVELOP A DISTINCTIVE CANADIAN SPIRIT

Ottawa.—Canadian club members should do their part to develop a distinctive Canadianism urged C. G. Cowan, of Ottawa, president of the Association of Canadian Clubs, in welcoming the delegates to the opening session here of the 14th annual meeting of the association.

Mr. Cowan, in his presidential address, said that ties, tradition and sentiment keep Canada a part of the British Empire, but that was no reason, he pleaded, why Canadians should not develop an individuality. It was not necessary, urged Mr. Cowan, that Canadian institutions should be simply imitations of either British or American. In a number of ways Canadians have already shown capacity to develop their own institutions.

Interchange of speakers and visits of club members will be confined, said Mr. Cowan, as the policy is considered effective in discouraging racial and sectional prejudices. Too much is being heard, Mr. Cowan went on, quoting the remark of a recent writer, of east and west, of Ontario and Quebec, and not enough is being heard of Canada.

It was announced that preparations are being made for an adequate celebration next year of the sixtieth anniversary of Confederation through-out the Dominion. There will be a celebration in the capital, said Mr. Cowan, and also throughout the provinces, and the Canadian Clubs will be urged to take definite steps in that connection.

Canada Not A Candidate

Will Not Ask For Seat On League Council Says Sir George Foster

Paris.—The den correspondent of Excelsior, a daily paper of Paris, states that some of the British dominions are urging Canada to ask for a seat on the league council, but he adds that Sir Austen Chamberlain, British foreign secretary, is not in favor of this. Other powers, the correspondent says, are not in favor of the proposal.

Sir George E. Foster, in reply to a query at Geneva, said that Canada was not a candidate for one of the nine newly created non-permanent seats on the council.

Offers \$1,000 Reward

Edmonton, Alta.—Rewards for the discovery and conviction of the person or persons responsible for the recent bombing outrages in this city have been increased to \$1,000.

She Dances to the Waterfall.

The wonderful setting for the little waterfall known as the Glacis Falls, Paradise Valley, near Lake Louise, apparently inspired this water-dancer with the idea of her act, and with the song of the water and the soft whistling of the bird-life abounding in the woods around. She was photographed while dancing to the music of her soul.

Oppose Wage Increase

Railway Companies Present Their Case In Wage Dispute

Montreal.—Maintaining that the present cost of living and the ratio of pay now in existence as they affect conductors, trainmen and yardmen on the C.N. and C.P.R. do not justify an increase in wages, representatives of both railways presented their case to Mr. Justice Hugh T. Kelly, of Toronto, and his two colleagues on the board of arbitration and conciliation now attempting to arrive at a settlement in the wage dispute between employees of the two railways and their employers.

The railways point out that the existing rates were established by a board of conciliation in 1921 and that since that time the railways have suffered substantial reductions in passenger and freight rates and the cost of living has also decreased somewhat. The existing wage scale, they point out further, is the outgrowth of conditions developed during and subsequent to the war.

With regard to the present applicants who, the railways claim, are among the highest paid classes of railway employees in the Canadian service, the joint statement of the companies points out that the application is identical in all respects with those already submitted to and declined by the United States roads.

Trouble In Spain

Belief Is Expressed That Revolt Is Only Sidetracked

London.—Unceasing dispatches from Spanish correspondents of some of the London morning papers represent the trouble in Spain rather as having been sidetracked than definitely overcome by authorities.

A dispatch to the Daily Express from Barcelona reports that the army in Spain has been split in two, that there have been mutinies throughout the country and that the navy is exhibiting unrest.

Hundreds of apprehensive Spaniards are said to be fleeing into France to invest their capital there.

Continue Customs Probe

Inquiries In Maritime Finished and May Be Resumed In Vancouver

Montreal.—The royal commission investigating the administration of the customs department has now finished its inquiries in the Maritime province and will probably proceed at the beginning of next month to Vancouver, it was stated by R. L. Calder, K.C., counsel for the royal commission.

After Vancouver the commission would probably proceed to Windsor, Ont., and Toronto.

GERMANY NOW IS A MEMBER OF THE LEAGUE

Geneva.—Germany, with impressive unanimity was elected a member of the League of Nations, and was thus bidden to enter the portals of Geneva's institution of peace.

Without a dissenting vote also Germany was designated "one of the five" as president Nitschke put it, a member of the league council, and will thus sit as the equal of France, Great Britain, Italy and Japan.

Germany has accepted the action of the league, for Sir Eric Drummond, secretary-general, received a telegram from Gustav Stresemann, the German foreign minister, announcing the departure of a German delegation to Geneva, and by this acceptance commits herself to submission to all the obligations and responsibilities under the covenant of the league, which was fashioned to outlaw war.

The assembly also ratified the recommendation for an increase of the number of the non-permanent members of the council from six to nine.

Another incident compelling international attention was India proclaiming with an fervent voice her ambition to become a self-governing country, like Canada or Australia. Speaking first in perfect English, then translating his own address into flawless French, the Maharajah of Kaptipattal, with the latest of the colonial garb, spoke feelingly of the awakening India, voicing the united and self-governing country like Canada or Australia.

He related India's progress in the social and hygienic fields and assured the delegates that India's 300,000,000 inhabitants were represented at Geneva by a delegation ready and eager to do its share in the betterment of the world.

Now that Germany's advent into the league is assured, statements are non-contrasting their attention on the question of the Reich's probable political activities at Geneva. Leading delegates venture the hope that Germany will not act brusquely but will feel her way gradually toward a solution of outstanding problems, such as the restoration of her colonies and the evacuation of German soil.

Wrecked German Express

Two Unemployed Men Caused Death Of Twenty-two Passengers

Berlin.—Two unemployed men, Otto Schlegel and Wilhelm Weber, arrested on suspicion of having caused the disaster to the Berlin-Cologne express near Lehrte, August 19, in which 22 passengers were killed, are said to have confessed.

The police assert that the men said they tore up the track with the intention of derailing the train, but when the wreck occurred they were so horrified by the screams of the injured that they fled, abandoning the chance to plunder the coaches.

Plans Visit To Palestine

Prince of Wales Will Dedicate War Cemetery Next Year

Jerusalem.—The Prince of Wales will visit Palestine during April of next year, to dedicate the war cemetery on Mount Scopus. It is known here that the prince will be accompanied by the Duke of York.

General Sir George Macdonough, Sir Frederic Kynyn and Lord Arthur Brown have inspected the war graves on behalf of the British war graves commission.

Encourage Irish Emigration

London.—In a letter to the Morning Post, Lady Aberdeen suggests a plan to encourage Irish emigration to Canada, namely that brothers and sisters of all classes should go out together, chain their land-grant, take service with neighboring farmers and learn farming and the customs of the country while watching over the protection of their house and the preparation of their farm.

Ends State of War

Madrid.—King Alfonso signed a decree ending the state of war which was proclaimed throughout Spain in consequence of the mysterious movement in the artillery corps.

ANNUAL POW-WOW OF JASPER SQUADRON OF TRAIL RIDERS AT BEAUTIFUL MALIGNE LAKE

NEARLY all of Canada and several of the eastern United States, as well as far away India and the British Isles, were represented at the first annual pow-wow of the Jasper Squadron of Trail Riders of the Canadian Rockies on July 21st, held in the heart of Jasper National Park and 35 miles from the nearest settlement. Around the big camp fire, built so close to the shore of Maligne Lake that its flames mingled with the snow-tipped reflections of the great mountain peaks which surround this finest of all Rocky Mountain lakes, gathered the riders who made the trail trip.

The pow-wow was called to order by Major Fred Brewster, commander of the squadron, and vice-president of the main body, and by a unanimous vote the following slate of officers was re-elected for 1926-27: Commander, Major Fred Brewster; secretary-treasurer, H. S. Davis; mileage committee, R. W. Langford, Digby Harris, T. W. McLaughlin and Donald "Curley" Phillips. A decision was reached to hold the next annual pow-wow in the Teton Valley, beside Amphyl Lake, at the foot of the "Came-

parts," where the Canadian Alpine Club is holding its annual meeting this month.

Numbering more than 100 members, the Jasper Squadron represents almost every country in the world, including on its roll such personages as the Earl and Countess Haig; Yuki Maki, greatest of all Japanese Alpinists; Haake Moe, son of the Premier of Japan; Sir Henry Thornton, president of the Canadian National Railway; Irving Cummings and J. Ferrel Macdonald, of movie fame.

Those in attendance at Maligne Lake were: Miss M. E. Nickell, Toronto; Miss C. R. Nickell and Miss Hazel Reid, Calgary; Mrs. C. L. Weldon, Calcutta; Miss Rosalie Easburt, Brooklyn; Mr. W. H. Jones, New York City; Mr. Henry G. Fowler, Toronto; Professor and Mrs. Albert Britz, Galesburg, Ill.; Professor H. W. Sheldon, Edmonton; George H. Brown, Cambridge, Mass.; Professor E. V. Huntington, Harvard University, Cambridge; Osborne Scott, general passenger agent, Canadian National Railway, Winnipeg; Ray Peck and Arthur Carter, Ottawa; W. H. Robinson and G. H. Leach, Montreal; Joe Har-

ria, Boston; A. Wilkins, Guildford, England; Professor Neave and Allan Mosely, Winnipeg; J. Woolston, Philadelphia; Major and Mrs. Fred Brewster, H. S. Davis, Digby Harris, Rob Jones, Charles Bowen, Dean Swift, Harry Mellor, John Toomey and Grant Hare, Jasper.

The top picture shows Maligne Lake, glacial fed and nestling among the Onal Hills with snow-capped mountains in the background. The Trail Riders in the foreground, from left to right, are Ray Peck, Miss Hazel Reid, Osborne Scott, Miss M. E. Nickell, H. S. Davis, Miss C. R. Nickell, Henry G. Fowler and P. H. Jones.

Lower left: Advance Riders at the summit of Shovel Pass, at an elevation of 9,000 feet.

Lower right: Miss Rosalie Easburt, of 692 Fulton Street, Brooklyn, who climbed to the top of Mount Leah, 9,800 feet, in the Maligne Lake section of Jasper National Park on the day of the Trail Riders' Pow-Wow and by so doing achieved the distinction of being the first woman to ascend that peak.

Here and There

Whaling operations off the coast of British Columbia this year have been very successful, and to the end of July the fleet had caught 183 whales. There are only six steamers operating this year, while last year the number was eight. The weather has been good to date and very little fog has been encountered.

Fire chiefs representing the stations in Montreal and various nearby centres left over the Canadian Pacific lines about twenty strong for Windsor recently to attend the annual convention of the Dominion Association of Fire Chiefs, which was held August 24th to 27th. The Association is made up of over 250 chiefs from all parts of the Dominion.

Nearly 2,000 racing pigeons, owned by pigeon racing devotees in Montreal, were shipped through the Canadian Pacific Express yards at Montreal recently to various points in Quebec and Ontario where they were released by the agents at the points to which they were shipped to fly back to their home roosts in Montreal. Practice races of this nature have been carried on through the summer months.

Thomas Meighan arrived in Winnipeg recently from Chicago prior to beginning work on his next picture, "The Canadian". The wheat fields of the Canadian West will be the background for this picture.

The location men and other members of the troupe passed through Montreal earlier on their way to the west where they were joined by Thomas Meighan, and they are looking over the Calgary district for a suitable location.

Announcement was made at the headquarters of the Canadian Pacific Railway at Toronto recently that, effective September 1st, Robert Niven, theatrical and special business clerk in the passenger department of the Company at Montreal, has been appointed assistant district passenger agent at Toronto. Mr. Niven is well known to the theatrical fraternity passing through Montreal with whom he came in contact in his business.

"I am convinced that Canada offers unlimited possibilities to immigrants from the Old Country," said the Marquis of Salisbury, Chairman of the Empire's Parliamentary Association and leader of the Conservatives in the British House of Lords, when interviewed at Vancouver recently.

His Lordship sailed recently from Vancouver to Australia to attend the Empire Parliamentary Association Conference in that Dominion this fall.

The first automatic or "remote" control power plant on the North American continent is to be built at the Slave Lake side of the tunnel connecting that body of water with Alouette Lake. The contract has been let by the British Columbia Electric Railway to a Vancouver construction company at a price of \$500,000. The total cost of constructing a dam across the Alouette River, building a tunnel connecting the lake with Slave Lake and erecting a new power house will be approximately \$2,800,000.

Over 50,000 railway cars which if placed end to end would stretch more than 400 miles are now available on the western lines of the Canadian Pacific Railway to handle the fall traffic in grain and live stock. The combined capacity of the 48,256 box cars for the grain crop which will be transported to the head of the lakes, is 570,040 tons. These are capable of carrying 60,530,000 bushels of grain each trip. Estimating that the cars make five trips between the grain fields and the head of the lakes or Vancouver the Canadian Pacific Railway Company is in a position to handle more than 300,000,000 bushels during the four months of the peak rush.

Notice to Creditors and Claimants

IN THE ESTATE OF PHILLIP UNDERSCHULTZ or UNDERSCHULTZ (deceased),
farmer, deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the above named Phillip Underschultz or Underschults, who died on the 6th day of August, 1925, are required to file with ROBERTSON, WINKLER & HAWK, Solicitors, etc., 410 McLeod Building, Edmonton, Alberta, by the 3rd day of November, 1926, a full statement of their claims, and of any securities held by them, and that after that date, the executors will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed, or which have been brought to their knowledge.

DATED at the City of Edmonton, in the Province of Alberta, this 14th day of September, 1926.
ROBERTSON, WINKLER & HAWK,
Solicitors for the Executors,
410 McLeod Building,
Edmonton, Alberta.

Strange, Romantic Love Adventures of the Slapper you know

Joanna

by H. L. GATES

Published by arrangement with First National Pictures, Inc.

CHAPTER XIV—Continued.

She talked on, saying things that were meaningless to Joanna, the obvious things that had to do with the beginnings of a new friendship, and the prospects of a "jolly" time for the girl in a new life. A trim, lace-up, and white head-dressed maid answered Yvonne's summons and replied to her mistress's questions that Miss Manners' apartment was in order.

"I've a little bedroom and a cozy sitting room for you, not too far from my own," Yvonne explained. "I hope you will be no discomfortable."

At a finger touch, a gold panel in the wall of the reception-hall slid back, disclosing a tiny lift elevator of the kind that is automatic. The maid followed them into the lift and pushed the buttons that sent it climbing to an upper floor. Joanna was strangely trepidulous. She wanted to say bright things to the older woman who was ushering her into these new and luxurious surroundings, but her mind was in an uneasy turmoil. "Why was everything happening as it was? So naturally, so swiftly, so smoothly? Should she trust herself to Yvonne's counsel? She stole a glance at the woman who stood so close to her, and comprehended her extraordinary fascination, the hair that was as black as rutilant, the magnolia-white face contrasting sharply with her uniform black eyes, and the lips that were full and red without the ex-

aggeration of lip stick contours. The fear that vibrated through her at times with Joanna, the indubitable fear that seemed to unconsciously rip her for a second. Then her thoughts flashed to what Yvonne's maid had said in the room downstairs: "A slapper, or a dancer, or something like

Yvonne swept the girl's face with a quick glance. "What do you know about me?"

"What was there wrong about her?" She had put on her grey tail coat, and the maid had been a smart, grey clothed but was from famous Avenue shop. Did she still remind one of the silk counter? And if she did, what of it? Weren't the imitations of the silk counter all right? Certainly there had been no girl in her men go-as-fast-as-you-can, without a skidding crowd, who could profess to cause men's wives to need consolation because of them. But, of course, Yvonne had not been serious! It was just a manner of talk; the small talk she would have to learn.

All of these things flashed through the girl's agile mind while the tiny gold elevator lifted from the first floor to the third. When the car had stopped, the maid had slid open the narrow gridded door and stepped out, Joanna had dispersed her doubts with a determined wave of confidence. The arrogance came back into her eyes and to her lips. "She'd get on, or she'd taken an awful nap!"

It was difficult for "Miss Yvonne" to understand, for a time that the exquisite miniature drawing-room, rose shaded and satin hung, with windows looking down upon an open garden, was to be exclusively hers. With John, through such evenings as she had consented to stay in with him, she had planned, or rather, listened to him plan, the house that he would some day build for themselves. They had endowed this dream house with many like fancies, but in her visions there had been no such splendours as the "little" room, with its rose bedroom and canopied bed beyond the softly draped door, which Yvonne had prepared for her. And Yvonne was saying:

"You will want your own maid, of course. But I haven't engaged one. You will want to engage her yourself. I fancy Walker can send you a collection of them—he has a way of predicting them when they're needed. I shall advise a French girl, or an English one. The first will be more skillful, the other more loyal."

Joanna couldn't tell her laugh. "You'll have to tell me what to do with a maid," she explained. Then something like a phantom of fear hovered suddenly in the deep brown eyes. "You know, I feel terribly alone," she said, "and terribly afraid of myself, I mean."

"You will want your own maid, of course. But I haven't engaged one. You will want to engage her yourself. I fancy Walker can send you a collection of them—he has a way of predicting them when they're needed. I shall advise a French girl, or an English one. The first will be more skillful, the other more loyal."

Joanna couldn't tell her laugh. "You'll have to tell me what to do with a maid," she explained. Then something like a phantom of fear hovered suddenly in the deep brown eyes. "You know, I feel terribly alone," she said, "and terribly afraid of myself, I mean."

Yvonne swept the girl's face with a quick glance. She looked quietly to the maid who fluttered about the room. The maid went out, closing the door behind her. To Joanna Yvonne said: "Come and sit down." She indicated the divan beside her. "If you'd like one there are cigarettes in the box on the table. I think I'll have one, too." Before she spoke again she drew a contemplative puff and allowed the smoke to curl slowly from her lips. Joanna watched her silently. Her first words were abrupt.

"There are a great many people who enjoy themselves talking about me," she said. "And some of them take an especial delight in talking in whispers. What do you know of it?"

These were tactics that would not disconcert Joanna. She was too accustomed to making sudden attacks herself, or defending them. "Only what everybody knows," she replied frankly. "I've read about you, you know, and your pictures always are in the newspapers. I've thought more of you than I ever did of a motion picture star, and that's a lot."

This was more difficult. The girl hesitated; faltered. Again Yvonne's voice, clear, bell-like, clipped the one word:

"Why?"

"I think," Joanna ventured, "it's because you make people talk about you. Wherever you go, and whatever you do, people talk about it. It's being famous and besides, being famous for nothing, not for what you do. And you have such a wonderful round of pleasures."

Yvonne contemplated her calmly again, following the fax, drifting off its wreath of smoke. "No," she said. "That is not the reason you have been interested in me; and it is not the reason you were so willing to come to see when I invited you."

A smile suddenly played at her mouth and she nodded at the girl on the divan beside her. "Is it?" she insisted.

Joanna smiled back at her. "No, I don't think it is, altogether," she agreed brightly, "but that is as close as I can put it into words. You see, all my life, that is, since I've been alone and making my own way, I've had to fight hard to keep up with the crowd. I've wanted things that you can't have, or enjoy, when you're

skipped. The things you need to make a show. The best I could ever do was owe somebody instalments on a dress, or a wrap or my shoes, and keep my eyes open for runs in my stockings. I've looked all right, and I've laughed a lot, but things have always happened to make me cry; too."

Again that bell-like voice of the older girl clipped off a question: "What, for example?"

Joanna studied a moment, her eyes looking out into the room. "They were just such little things," she protested; "things you wouldn't understand."

"I think I would understand," Yvonne persisted.

"But you wouldn't," Joanna argued. "One like you simply would not. I've cried my fool eyes out, often, because some man—some boy I liked, wouldn't stay square. And I've had nobody to talk anything over with. Mostly, people who were worth while to talk to have gone dead. I mean, they don't know. When I cut my hair they thought I cut off my morals, and if I go off alone on a party they think I ought to be in a lair. When they tell me I don't act like the girl of yesterday I have to say who cares a hang about yesterday when there's no many today and then I'm told I'm just plain bad. Once in a while I get so cut up about it that I have to have a cry." She thought she finished truthfully. She smiled a little at the nullity of her explanations. But Yvonne displayed no amusement. She said very quietly:

"And don't you think that I am cut up a bit, now and then, when the people who are worth while, as you say of them, interpret me as both plain bad and fancy bad? Perhaps I am. There are different ways to view everything, but—well, she broke off, and was silent for a brief moment: "Well, you see that I do understand, after all," she added. And then: "You were glad to come to me because you think I am of today, and not yesterday; that I am the proof of all your little theories of what a woman ought to be today—isn't that it?"

(To be continued)

Canadian Industrial Development

Assisting Manufacturers and Others in Locating New Materials

In pursuance of its work of advancing Canadian industrial development through the further use of Canadian resources, of advertising opportunities for investment of capital in prospecting, mining and recovering the wide variety of economic minerals both metallic and non-metallic found in the Dominion, of assisting manufacturers and others in locating raw materials for their products, the development branch of the Canadian Pacific Railway Company's department of colonization and development publishes a very complete set of the synopsis or leaflets descriptive of these resources located along its lines. The revised issue giving all the latest information available up to date of 1925 has been distributed to the permanent mailing list.

The set comprises 57 leaflets each containing from two to six pages. They cover all the important minerals and resources of the Dominion, including the forestry situation. Over 500 complete sets and a large number of individual copies of the latest revision have just been mailed from the Montreal office of the company's development branch.

The writer of compiler of each synopsis is a man selected for his outstanding knowledge of the subject dealt with. Figures and statistics are the latest procurable from the Dominion Government bureau of statistics and other authentic sources. Each subject is treated as fully as consistent with a concise, summarized presentation of the facts in the briefest possible form.

That business men, financial houses, mining interests, educational establishments and others find these publications of value is evidenced by the fact that in the two years since the first distribution was made, over 7,000 copies have been furnished on request, and the demand is increasing. Apparently they fill the requirements of a brief survey of each situation from which the business man can obtain the salient facts he requires on the special subject of interest without search of voluminous reports or reference to books covering a variety of other irrelevant subjects.

An unprovable apartment house is a flat failure.

Minard's Liniment for bruises

CANCER

The potentest treatment, introduced by the late Dr. F. W. Force, has been scientifically perfected. It has been used by thousands of men, women, and children, and has achieved the most successful results. It is a simple, safe, and effective treatment for all forms of cancer, including skin cancer, breast cancer, and prostate cancer. It is a true cancer cure, and it is a true cancer cure.

CANTASSIUM TREATMENT

Experience of many thousands routine the great English authority's statement.

"Cancer is a Blood Disease Caused by Plasmic Deficiency."

It is a simple, safe, and effective treatment for all forms of cancer, including skin cancer, breast cancer, and prostate cancer. It is a true cancer cure, and it is a true cancer cure.

Little Helps for This Week

One only is the law-giver and judge, even He who is able to save and to destroy; but who art thou that judgest thy neighbor?—James iv., 12 (R.V.)

Thou alone
Keapest judgment for Thine own;
Only unto Thine is known:
What to pity, what to blame;
How the harvest temptation came;
What is honest, what is shame.

—Allen Carey

God sees us altogether, not in separate feelings or actions; our confidants men see us. We are always doing each other injustice, because we only hear separate feelings or actions; we don't see each other's whole nature;—George Eliot.

No man can justly condemn or condemn another because, indeed, no man truly knows another.—Sir Thomas Browne.

SUMMER HEAT
HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand, the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Several of these troubles may prove deadly if not promptly treated. During the summer months the mother should use Baby's Own Tablets. They regulate the bowels, soothe the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Isn't it queer that the things people usually want to know most are none of their business.

Cuticura TALCUM

The Ideal Powder For Daily Use

This pure, delicately medicated, antiseptic powder does much to overcome excessive perspiration. It soothes and cools, is convenient and economical and is an ideal face, skin, baby and dusting powder.

Solely Sold Free by Mail: American Cuticura Co., 125 Chestnut St. N. E., Salem, Mass. Cuticura Shaving Soap Sold Everywhere.

EXPECTANT MOTHERS

Read Mrs. Menard's Letter. Her Experience May Help

Chatham, Ontario.—"I want to tell you how much good your medicine has done me. Before my baby came I felt weak and run-down. I hardly do any work. My husband and I were so discouraged that I could cry from my own weakness. I had a very bad time of it, and a half old and he gave me a lot to do. So I thought I would try Lydia E. Pinkham's Vegetable Compound, as I had read so much about it in the little book. I found a difference right away as my head was relieved and my tired feelings gone. My sister had been doing my washing and she continued doing it, as she said it might set me back. I started to do it again. It was so good to me and I had taken just two bottles when my baby came. He is a fine big boy, now nearly five months old. I am taking your medicine again and I am able to do my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as I believe they need help at those times. Mrs. Clarence Menard, 51 Center St., Chatham, Ontario."

Election Notes.

In West Edmonton, in which Stony is situated, Hon Charles Stewart was elected over Col. Jamieson; the vote in Stony Plain town was: Stewart 90, Jamieson 62.

The result of the Federal election in this Constituency last October was: Stewart, Liberal, 6394; Douglas, Conservative, 4706; East, Labor, 2007. Stewart's majority 1688.

A summary of the results, Wednesday night, all over the Dominion, showed that the Liberals have 118 members elected; Conservatives about 90; Progressives 8; Liberal-Progress 4; U.F.A 11; all from Alberta; Independent 2.

TENDERS FOR SALE OF DEBENTURES.

TENDERS will be received by the undersigned up to 6 P. M. on THURSDAY, the 23rd Day of September, 1926, for the purchase of about \$6,000.00 worth of Local Improvement Debentures of the Town of Stuy Plain.

The Debentures run for ten years and bear interest at the rate of 6 per cent per annum, computed so that the principal and interest are payable in equal amounts each year.

The Tender is to state the amount required and price for \$100 Debenture.

The lowest or any tender not necessarily accepted.

For further particulars apply to the undersigned.

DATED this 15th day of September, 1926.

F. W. LUNDY,

Secretary-Treasurer
Town of Stony Plain,
Alberta.

Stony Plain and District.

In Edmonton, at 8.30 p.m. on Wednesday, Sept. 15th, 1926, by the Rev. Canon Pierce-Goulding, Rector of All Saints Pro-Cathedral, Miss Mildred Mountain, of Edmonton, was united in marriage to Mr. Frankland K. Clarke, of Jasper (son of Mr. and Mrs. John F. Clarke, of Stony Plain). The happy young couple will spend their honeymoon on the Coast.

Meredith Bros, shipped a car of stock on Tuesday.

J D Stafford, western manager for the Brooks Elevator Co., was a visitor in town this week.

A dance was held Saturday evening at the George Goebel ranch, in Rosenthal district, which was well attended.

While driving along an Edmonton street last week Mr Aleck Graden had the misfortune to have a radius rod on his car break. The vehicle skidded and collided with another car, injuring a man who was standing by it.

Joe Babieu, Delco agent, this week installed a lighting plant on the premises of the Duffield Trading Co.

Stony Plain W. I.

The Stony Plain branch of the Women's Institute met Wednesday, Sept. 8th, at the home of Mrs L Kowensky, there being present 16 members and 8 visitors.

Mrs R B Brooks, the President, occupied the chair, and the meeting opened with the singing "The Old Folks at Home." After the usual business was transacted, Mrs Price read an excellent paper entitled "Some Pioneer Women of Alberta."

We were pleased to welcome three new members.

After tea, served by Mrs Oatway and Kowensky, the meeting adjourned.

Spruce Grove News

Mr and Mrs H Loeblich have at the present time two of their daughters, from Tacoma, Wash., visiting with them—Mrs Blodgets and Miss Eliza Loeblich.

An auction will be held next Saturday evening of the goods and effects of the late "Bill" Langer.

Another auction sale will be held Saturday, Sept. 25th, at the J. Brox farm, Spruce Grove, of the stock and goods belonging to the estate of the late Pa Unterschuetz. See posters.

"The Dook" says he's on the water-wagon, but his friends predict it won't be for a very lengthy period.

The work on the building of the new Gillespie elevator is about completed, and the staff is now busy on the interior fittings.

Mr R Heichen has secured the appointment as assistant to the manager at the U G G elevator.

Mr E Pinchbeck is down in the southern part of the province this week, attending the sessions of the commission appointed by the Provincial Government to inquire into Alberta's revenue, expenditure and taxation. Mr Pinchbeck is a member of this Commission.

Jasper Highway News.

Contractor Dickie has the roof on his new hall, and we might say that the hall is a credit to the Jasper Highway. Dickie is going ahead soon to complete the outside of the building; and also put an addition on the west end of the hall 18x32, 1 1/2 storeys, with a small basement under; and intends to install a large furnace to heat the hall. Half of the new addition floor will be elevated two feet higher than the hall floor, for a stage and orchestra. The other half will serve as a refreshment stand and show room.

Dickie is going to handle and sell several articles from samples this winter.

Dickie is also going to have a real old-time stove fireplace in one corner of the hall and make a lounge room for the real sports who travel the Highway to drop in and have a smoke and warm-up. Dickie has also secured the selling agency for the new Homelite Portable Electric Light and Power Plant; backed by unlimited guarantee by the Manufacturing Homelite Corporation of New York and handled by the University of Alberta.

Dickie intends to install one of these plants for demonstration purposes and to light the hall. The plant weighs only 110 lbs., needs no foundation, can be carried around any place and retails for \$320—\$100 cash, balance \$25 per month.

Dickie has had quite a struggle putting the hall as far ahead as he has it—weather conditions and other things have been against him; but Dickie assures us that he is going to have a hall that will be a credit to Jasper Highway when completed.

The next Big Dance, a real dance, will be Friday, Sept. 17th. Martin's Orchestra will supply the music.

AUCTION SALE!

Under instructions from the Public Administrator, the Effects of A L Langer, deceased, will be sold publicly at the Spruce Grove Municipal Office.

At Spruce Grove,
at 8 P. M. on
Sat. Sept. 18, 1926.

The Effects consist of—
1 Stevens Repeating Shotgun;
1 Trunk, with an assortment of Clothing and Bells;
Carpenter's Tools;
Quantity of Machinist's Tools;
12 Duck Decoys.

Dan Brox, Auctioneer.

DANCE!
Jasper Highway Amusement Hall,
Friday, September 17.
Martin's Orchestra.

THE WHEAT POOL AND TRADING IN FUTURES

The Chicago Price Current Grain Reporter, the organ of the Chicago Grain Trade, there appeared early in August an article referring to the delivery of three million bushels of wheat on the last day of July by the Pool to cover sales made on the July option. The Central Selling Agency of the Canadian Pools felt at the time that this article was not worth much attention. Recently, however, it has appeared as a paid advertisement in the form of a news item practically all of the Western Canadian weekly newspapers. This advertisement was sent out by a general advertising agency already set in stereotype plate forms with the following instructions to the newspapers:

"Do not add printer's or advertising marks of any kind to the plate."

In view of this organized effort to misrepresent the transaction to the farmers of the west, the following facts are hereby given:

On July 1st the Sales Department of the Canadian Pools knew of the existence of a short interest in July wheat. July is the one month in the year when there is the least actual wheat stored by the grain trade or the farmers, available for delivery and when the contracts are most heavily made on the part of speculators to squeeze the market. It soon became evident that an attempt of this sort was to be made. The Pool had in store a fair quantity of No. 3 Northern wheat for which there was no immediate export sale, in competition with which on the world market the price of No. 2 Hard Winter wheat from the United States, which was selling at from 18 to 22 cents under Canadian No. 1 Northern wheat. This attempt at a corner soon forewent by the price of July wheat up to a point where the Pool felt they should sell some of their wheat, especially as they were able to sell No. 3 Northern wheat at around 10 cents per bushel over the price at which No. 2 Hard Winter wheat was being sold. The "long" interests in July wheat acted apparently on the assumption that the Pool would not step into the market at this time and they were, therefore, naturally surprised when, instead of being able to force a cash settlement with the "short" interests at the close of the month, they were faced with the actual delivery of this wheat. With the expiration of the July option and the pricking of the bubble, the men who had attempted to squeeze the market found themselves with a large quantity of wheat on hand which they had bought at the inflated July prices and which they would now be compelled to dispose of in competition with the American wheat. At the meantime the Pool had obtained for its members a very good price for their wheat.

The Pool is charged in the article referred to with having depressed the market by the delivery of this wheat, yet, as a matter of fact, No. 1 Northern wheat is at the time of writing trading slightly above the price at which it stood on July 1st. The statement is also made that the Pool had been throwing wheat on the market during the month of July in quantities which had checked advances. This statement is also disproved by the actual figures. On July 2nd the price was \$1.40 1/2, on July 5th it was \$1.55 1/2, and the high point reached between these dates was \$1.62 1/2.

The charge is also made that the Pool is speculating in futures contrary to its expressed principles. The fact is that the Pool takes advantage of every available market to dispose of the farmers' wheat and on this occasion it happened that the attempted corner gave the Pool an opportunity to sell a quantity of wheat which they had actually at their disposal at a price which was temporarily higher than other markets offered. The Pool was not selling power wheat with the object of buying it in again at a lower price, which is the method of the speculators, but was disposing of farmers' grain which they had for sale.

These are the facts of the operation and show that the "long" interests in July wheat lost out in their efforts to rig the market for their own benefit, while the Pool had succeeded in marketing a very satisfactory price, a large quantity of wheat.
